(54) Title: **BROADCAST DELIVERY TO A WIRELESS DEVICE**

(57) Abstract: A broadcast media receiver (30) enables delivery of application programs and other data streams transmitted over broadcast media transmission networks to mobile communication devices. The receiver includes a receiver unit for receiving a first data stream (21) of broadcast media and at least one second data stream (22) over a first communication channel (20); data separation means (33) for separating the second data stream (22) from the first data stream (21); a transmitter/receiver unit (41) for communicating with mobile communication devices (50, 51) within a local, short range, transient wireless network (40) using a second communication channel; a monitoring device (37) for detecting a mobile communication device present on the local wireless network, and for determining a device type and/or configuration thereof; and a delivery device (35, 41) for delivering a third data stream (23), comprising at least part of said second data stream (22), to said mobile communication device according to the determined device type and/or configuration.

\* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \* & \* document member of the same patent family
